

SEASIDE PROMENADE MONOLITH

Coastal sandstone standing stone · deep-cut wordmark · bare (no infill) · no QR

- GENERAL NOTES
- Material: coastal sandstone (the cliff's own stone). For a forever-crisp inscription, — a sandstone-toned granite reads near-identical and lasts generations — sample both.
 - Inscription: deep-cut, bare (shadow only). Sandblast or hand-carve. Accept weathering.
 - Finish: natural riven top + split surround; dressed honed inscription panel only.
 - Lighting: a single warm 2700–3000K in-ground uplight at the base. Never cool / blue.
 - No QR here — rough texture + exposure defeat scanning; the marker is presence, not function.
 - Foundation, drainage & embedment by structural engineer; allow for salt-air durability.
