

SEASIDE PROMENADE MONOLITH

Coastal sandstone standing stone · deep-cut wordmark · bare (no infill) · engraved URL · inset QR

GENERAL NOTES

- Material: coastal sandstone (the cliff's own stone). For a forever-crisp inscription, — a sandstone-toned granite reads near-identical and lasts generations — sample both.
- Inscription: deep-cut, bare (shadow only). Sandblast or hand-carve. Accept weathering.
- Finish: natural riven top + split surround; dressed honed inscription panel only.
- Lighting: a single warm 2700–3000K in-ground uplight at the base. Never cool / blue.
- QR: never carved into rough stone — an inset matte plate (enamel / etched 316) sits flush — in the dressed panel; spec + verification as Sheet 1, panel 3. Scan-test in sun and dusk.
- Foundation, drainage & embedment by structural engineer; allow for salt-air durability.
